

REMARKS

Claims 18-26 were rejected under 35 U.S.C. §101. It is respectfully submitted that the present claim amendments overcome these rejections.

Regarding the §103 rejections, it is noted that some features of claim 8 have been incorporated into claim 1. It is respectfully submitted that the cited references do not teach or suggest these features.

Furthermore, new claim 27 recites the displaying the error message comprises displaying the error message when the one of the multimedia files that is dragged and dropped in the activated registration window according to contents "has a file type capable of being replayed by the multimedia players" but "does not have a file type that is consistent with the activated registration window according to contents." Thus, although the file type can be replayed, the error message is still displayed when the file type is not consistent.

The Examiner alleges that WMP7 of Thurott is unable to play back in many formats. Office Action, p. 8, ln. 2. However, claim 27 recites that the file type can be replayed. The Examiner also relies upon Hikida. However, this reference teaches displaying an error message when there is insufficient disk capacity to perform a copy operation. Hikida, col. 13, ln. 52.

The remaining references do not overcome these deficiencies. Withdrawal of the rejections is respectfully requested.

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
